

AZUBI-Mobil / Apprentice – ready to go 2019

HAVER & BOECKER USA

In the first three weeks of the summer holidays I went to America. There I was able to complete an internship abroad at HAVER & BOECKER USA in Georgia, Conyers.

I was warmly welcomed on my first working day. A short tour and a round of introductions followed. I got to know the other departments and employees of the company.

After a few days in the engineering department I was allowed to start with my own project: Planning of racks for horizontal storage of large sheet metal parts and creation of drawings and parts lists. The colleagues were always available to answer my questions and help me to solve problems.

I used my free time for shopping in the numerous outlets and shops and for sightseeing. A visit to the Georgia Aquarium and a laser show with fireworks were a must.

This internship abroad was a great opportunity for me to learn a lot of new things and gain experience. I will also be able to apply what I learned in my work here.

Finally, I would like to thank everyone who made this great experience possible for me.

Nele Gebing

In summer, Nicolas Hoer (electronics technician for industrial engineering) went to the USA for three weeks. There I did my internship at HBU in Conyers, Georgia.

After I was picked up from the airport by Kaira Sise-Stewart and brought to the apartment,

The next day started with the greeting of the employees and a tour of the premises.

For me it went into production, where the mechanical and electrical installation of a palletizer became my job. I was also allowed to install an ELEMENTRA Type 16 electrically.

The HBU staff was always available to answer questions. On my last working day, I had the opportunity to set up the test setup of the ELEMENTRA Type 16 and to attend the test runs.

On the days off we drove out of Conyers and visited numerous nearby cities as well as some sights such as the Georgia Aquarium or Stone Mountain Park where a laser show ended the day.

Visits to the many shopping malls and typical American activities were not neglected.

We spent our last Saturday with the entire HBU staff at their first summer party at a lake, where we had a barbecue, football and basketball.

Finally, I would like to thank all of the HBU employees for this interesting and informative three weeks as well as Haver & Boecker for this unique opportunity. It was a great experience and I could take a lot with me for the rest of my life.

Nicolas Hoer
