

AZUBI-Mobil / Apprentice – ready to go 2019

MAJOR, CANADA

Un été au Quebec – A summer in Quebec

On July 21, 2019, my flight took off for Montreal, Canada. As part of the “Apprentice - ready to go” project, I was able to immerse myself in the world of our subsidiary Major Wire Industries Ltd. for four weeks. After having spent an impressive week in Montréal in my spare time, my internship with Major Wire already started.

On the first day of work, I was first introduced to every employee and given a guided tour of the entire company. It was only here that I realized that I was in Quebec in the French-speaking part of Canada. Although I don't speak French, I was able to communicate well and even learned a few French words from my colleagues over lunch.

My task during the internship was to carry out a process analysis of a new and an old process in production. What was particularly exciting was the fact that the new process was or still is top secret and only a handful of employees know about it.

Since I had a rental car available, I was able to go out into nature on the weekends and visit some national parks for hiking. This was certainly one of my highlights, as the nature in Canada is breathtaking and is characterized by so much vastness.

I would like to take this opportunity to thank the staff of Major Wire Industries as well as the colleagues here on site who made this stay possible and above all unforgettable.

Jennifer Fechtler
