QUAT²RO
A HAVER & BOECKER BRAND

QUAT²RO PRODUCT PORTFOLIO YOUR DIGITAL OPPORTUNITIES

QUAT²RO – YOUR SOLUTIONS FOR PROCESS DIGITALIZATION

QUAT²RO[®] Production

Optimize your production management through seamless data exchange and automated management of your production components.

QUAT²RO[®] Batch

Achieve precise and consistent batch processing based on predefined formulations for liquids and bulk materials – ensuring top-quality results.

QUAT²RO[®] Logistics

Boost the efficiency of your intralogistics with fully automated plant traffic management through seamless ERP integration.

QUAT²RO[®] Visualization

Your innovative process visualization and control system for operating, monitoring, and controlling your production processes

QUAT²RO[®] Valve Check (AI)

Improve valve bag placement accuracy with an AI-powered system.

QUAT²RO[®] MatEx Check (AI)

Use AI to quickly detect unusual material leaks and bag bursts during the filling process in real time.

QUAT²RO[®] Seal Check (AI)

Inspect your sealed bag valves to ensure maximum quality control.

QUAT²RO[®] Bag Check (AI)

Ensure that the respective material is always filled into the correct bag types.

QUAT²RO[®] Connect – Platform

The central digital platform connects all relevant data sources and serves as the basis for all other Q applications – such as QUAT²RO[®] Insights and QUAT²RO[®] Dashboard. Thanks to its modular structure, the platform can be flexibly extended – tailored to your needs.

QUAT²RO[®] Connect – Insights

Analyze your production and machine data to unlock maximum optimization potential.

QUAT²RO[®] Connect – Dashboard

Create configurable dashboards based on your production KPIs for a personalized production overview.

QUAT²RO[®] Monitoring

Automatically and securely receive data on your production capacity and the condition of your machines or lines in real time – anytime and anywhere via a cloud service.

QUAT²RO[®] Weighing Data (DPS)

Manage all bag weighing data – from recording to analysis – with a comprehensive database system.

QUAT²RO[®] MEC Data (Parameter)

Save and edit your MEC[®] 4 machine parameters and product parameters directly on your PC.

QUAT²RO[®] Remote

Get the fastest and most professional support – worldwide and around the clock via remote access from our service experts using smart glasses and cameras.

QUAT²RO[®] Analytics

Receive long-term analysis of your production data and machine conditions by our experts for targeted production optimization.
