# Inspection of Test Sieve Shakers

## Inspection of Test Sieve Shakers within Quality Assurance

The standard EN ISO 9000 ff requires measuring instruments to be inspected at regular intervals (Recommendation every 2-3 years). The oscillation movements of test sieve shakers have an important influence on the sieving result. They are therefore regarded and treated as measuring instruments.

### Assessment for the Test Sieve Shakers:

After a successful inspection the test sieve shakers receive an inspection seal and an inspection certificate 3.1 according to EN 10 204. In case of unacceptable deviations or defects, a cost estimate for the repair is submitted to the customer.
